What is U-Learn?

U-Learn is a comprehensive educational cum administration software that facilitates a wide range of school activities and interactions, enabling efficient management of classes, announcements, attendance, and more. Additionally, it provides a unique marketplace for local vendors to offer their products and services directly to the parents within the school community.

Features of School's web platform

- ✓ **Student Profiles Management:** Schools can create and add profiles for students which will be managed by their parents. This centralises student data for easy access and management.
- ✓ **Class and Division Organisation:** The platform allows for the addition of classes with specific divisions or sections (e.g., 1A, 1B), enabling precise organisation and assignment of students to their respective classes.
- ✓ **Announcements Module:** Schools can make important announcements (e.g., PTA meetings, events) and target them to the entire school, specific classes, or divisions. This feature ensures that all relevant parties are well-informed about school activities.
- ✓ **Question Bank:** A repository where schools can create and store multiple-choice questions (MCQs) for various subjects and classes. This tool aids in the preparation of quizzes, exams, and assessments, facilitating the academic development of students.
- ✓ **Role Assignment:** Schools can assign specific roles to staff members and grant permissions for managing different areas like fees, attendance, etc. This role-based access ensures that each staff member has the appropriate level of control and responsibility.
- ✓ **Fee Collection Monitoring:** The platform provides a comprehensive view of fee collection, allowing schools to track which students have paid their fees and who have outstanding payments, ensuring financial transparency and efficiency.
- ✓ **Fee Master:** This feature enables schools to manage tuition fees in a flexible manner—either class-wise or subject-wise—offering a streamlined approach to financial administration.
- ✓ **Teacher Administration:** Schools can add teacher profiles, monitor their attendance, and manage their schedules, fostering an efficient educational environment.

Features that make Parent's app productive!

Child Profile Switching

For parents with multiple children enrolled in the school, the app provides an easy switch mechanism between each child's profile. This feature ensures that parents can effortlessly manage and view information specific to each of their children.

Attendance History

The app allows parents to check the attendance history of their children, providing transparency and ensuring they are up to date with their child's school participation.

Activity Feed

Parents can access a feed of activities and updates related to children. This feed can be customised to show information for all kids or filtered to focus on their child, keeping parents informed of school events, achievements, and daily activities.

Chat with Teachers

As part of U-Learn's comprehensive communication tools, the app includes a feature for parents to chat directly with teachers. This facilitates open lines of communication regarding a child's progress, behaviour, and any concerns that may arise.

Vendor Exploration

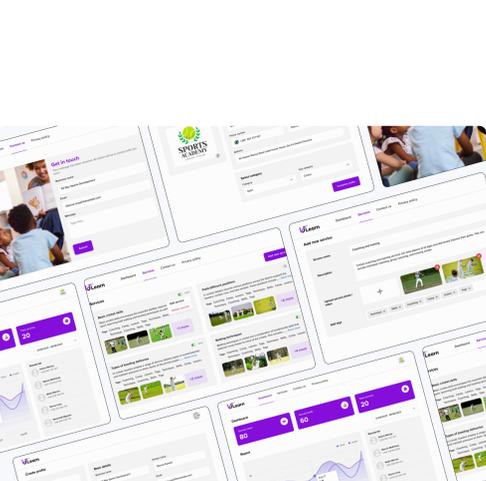

Through our platform, teachers can offer personalized feedback to students, highlighting their strengths and areas needing development. This constructive input fosters student growth and enhances communication between teachers, students, and parents.

Announcements

Teachers have access to school. This feature ensures that all teaching staff are informed about school-wide events, changes, or important notices, keeping everyone on the same

Features of Vendor's web platform!

Profile Creation and Registration

Vendors have the ability to create their profiles and register on the platform. This initial step allows them to become part of the U-Learn ecosystem and start reaching out to potential customers within the school community.

Business Details and Category

Upon registration, vendors can input details about their business, including the category and the specific services or products they offer. This helps in accurately listing and categorising their offerings.

Service and Product Listings

Vendors can list all the services and products they provide, complete with descriptions, pricing, and any other relevant information. This feature ensures that parents have all the necessary details.

Profile Views Tracking

The platform enables vendors to track the number of views their profile receives, giving them insights into the popularity and reach of their listings within the community.

Lead Management

Vendors can monitor and manage leads generated from their listings, such as inquiries from parents. This includes tracking total leads and engaging with interested parties directly through the platform.

Features that make Parent's app productive!

School switching

Our app helps teachers easily move from one school to another. It makes paperwork simple and ensures teaching goes on smoothly for both teachers and students.

Attendance History

The app allows teacher to mark the attendance of their children, providing transparency and ensuring they are up to date with their child's school participation.

Activity Feed

Teachers can manage and customize a feed of activities for their students. This feature allows teachers to add events, updates, and achievements, keeping parents informed about school activities and their child's progress.

Chat with parents

As part of U-Learn's comprehensive communication tools, the app includes a feature for teacher to chat directly with parents. This facilitates open lines of communication regarding a child's progress, behaviour, and any concerns that may arise.

Feedbacks

Through our platform, teachers can offer personalized feedback to students, highlighting their strengths and areas needing development. This constructive input fosters student growth and enhances communication between teachers, students, and parents.

Announcements

Parents have access to announcements made by the school. This feature ensures that every parent is informed about school-wide events, changes, or important notices, keeping everyone on the same page.
